Hierarchy of Headings

LibreOffice Writer supports up to 10 levels of headings H1 to H10.

Steps:

Step 1 Create a new document in LibreOffice Writer and enter the text, Heading 1 to Heading 10.

Step 2 Click the Styles button on the right sidebar, select Paragraph Styles ➔ Headings. A list of headings from Heading 1 to Heading 10 will appear.

READERS VENUE

Step 3 Place the cursor on "Heading 1" as typed in the document, then click on "Heading 1" from the Styles dialog to apply “Heading 1" style.

Step 4 Similarly, place the cursor on "Heading 2" in the document, then click "Heading 2" in the Styles dialog to apply the "Heading 2" style.

Step 5 Repeat this for "Heading 3" to "Heading 10" to apply the corresponding styles to each heading.

Creating a Table of Contents (ToC)

Step 1 Open the document.

Step 2 Assign proper heading styles to the various headings from the Styles dialog box.

Step 3 Place the cursor at the position where the table of contents is to be inserted.

READERS VENUE

Step 4 From main menu, select Insert ➔ Table of Contents and Index ➔ Table of Contents, Index or Bibliography. The Table of Contents, Index and Bibliography dialog box will be displayed.

Step 5 In the "**Title Text Box**," you can change the default name "Table of Contents" by typing a new name.

Step 6 Click **OK** button. The “Table of Contents” will be inserted in the document.

"Ye thory vala part important hota hai dhyan se padhna

By default, the checkbox for **Protected against Manual Changes** option is **selected**. This **protects the ToC** from any accidental change. If this box is unchecked, then the contents of ToC can be changed directly on the document page, just like any other text on the document.

In the **Create Index box**, the Entire Document option is selected by default. So the ToC will be automatically created from the headings and sub-headings of entire document.

A maximum of **10 headings** is supported, but this can be adjusted based on the number of headings you need to include in the table of contents.

READERS VENUE

Customisation of ToC

- Right click anywhere on the ToC and select Edit Index option from the popup menu.
- The Table of Contents, Index or Bibliography dialog box will be displayed.
- The dialog box has five tabs – Type, Entries, Styles, Columns and Background.

Type Tab: Active by default after opening the Table of Contents, Entries or Bibliography dialog box to insert the ToC.

Entries Tab: Contains options to set styles for various entries in the ToC.

Styles Tab: Contains options to apply the desired custom styles to the text of each level.

READERS VENUE

Steps to apply a custom style

Step 1 Click and select the level from the Levels list box.

Step 2 Click and select the desired paragraph style from the Paragraph Styles list box.

Step 3 Click OK button to apply the selected styles.

READERS VENUE

Note:- To remove the applied paragraph styling, select the desired level in the Levels list box, and then click the Default button.

Columns Tab: Contains options to set the number of columns that we want to have in our ToC.

Background Tab: Contains options to change the background of the ToC.

Steps to change the background color

Step 1 Click the Color button on the top of the dialog box.

Step 2 Select the desired color from the Colors palette.

Step 3 Click OK to apply the desired color to the ToC.

Note:- To remove the background colour from the ToC, click **None button** present on the top of the dialog box.

READERS VENUE

LibreOffice Writer also allows to add a graphic as a background of the ToC. For this, Select **Bitmap button** in the Background tab → Select **desired graphic option** → Click **OK** button **.**

Maintaining a Table of Contents

As new content is added and old content is removed, headings and page numbers in the document may change. These updates will only be reflected in the ToC when it is updated.

Updating the ToC

LibreOffice Writer does not update the ToC automatically.

READERS VENUE

Steps to update a ToC manually

Step 1 Right-click anywhere in the ToC.

Step 2 Select Update Index option. This will update the ToC.

Deleting the ToC

To delete the ToC, right click on the table and select Delete Index option from the pop-up menu. The ToC will be deleted.

Using Templates

A template is a preset layout that helps to create professional and formal documents easily.

Example:

- In our school, we use a report card with a predefined layout.
- The layout includes **School logo**, **Student name**, **Marks** organized in a table format, listed subject-wise.
- We save this layout as a template.
- With the template, we only need to enter each student's specific data to create a new report card document.
- Without the template, designing the report card from scratch every time would be time-consuming.

READERS VENUE

Checking the template of the document

- To find out which template is associated with a document, select Properties option from the File menu.
- The Properties dialog box will be displayed, this will display the teplate associated with the current document.
- If the document was created from the default template, no template name will be displayed.

READERS VENUE

Steps to create a document with template

Step 1 Create a new document from **File** > **New** > **Templates**.

Step 2 A template selection window will be displayed, then select a template.

Step 3 Click on **Open** button, a document with the selected template will open.

Step 4 Now check the template of the created document from **File** > **Properties**. Observe that the template name is displayed under Template in the Property Dialog box.

Creating a Template

Step 1 Open the document in LibreOffice Writer whose template is to be created.

Step 2 From main menu bar, select **File** > **Templates** > **Save**.

Step 3 Type the name of the new template in Template Name text box.

Step 4 Select the **category** of the template being created.

Step 5 Click and select Set as default template checkbox to make the current template as the default template.

Step 6 Click **Save** button to save the template.

Note:- A template in Writer is saved with an extension **.ott**.

READERS VENUE

Using In-built/Saved Templates

Insert Comment

This button is used to add a comment in a document.

READERS VENUE

Preparing a Document for Review

- Track Changes feature is used when a document is shared with one or more users for review or editing purposes.
- So, before the document is shared, one should make sure that the changes made should be recorded.
- For that, select **Edit** > **Track Changes** >**Record** option.
- Alternatively, select the **Record** button from the Track Changes toolbar. To make sure that no user is able to disable the track changes option, we can protect the document with password.

READERS VENUE

Steps to set the Password

Step 1 Create a new document in LibreOffice Writer. From the main menu, select **Edit** > **Track Changes** > **Protect** option. The **Enter Password** dialog box will appear.

Step 2 Enter the Password and click on **OK** button.
After protecting the document with password, if any user tries to disable the Track Changes feature, Writer will prompt to enter the password.

Recording Changes

- Once the Track Changes features is ON, to record the changes, press **Ctrl+Shift+C**.
- Alternatively, Click **Edit** > **Track Changes** > **Record** option.
- To stop recording, Click **Edit** > **Track Changes** > **Record** or click the Record button on the toolbar.

READERS VENUE

Accepting and Rejecting Changes

Once the changes are made by all the reviewers, the original author may accept or reject them.

Step 1 To accept or reject a change, click on the change made and then select **Accept Track Change** / **Reject Track Change** button.

Step 2 To navigate between the changes click **Previous Track Changes** and **Next Track Changes** buttons.

READERS VENUE

Step 3 To accept or reject all the changes made, select **Accept All Tracked Changes** / **Reject All Tracked Changes** button respectively.

Step 4 If **Manage Track Changes** button is clicked, a **Manage Changes** dialog box appears. It contains the details of all the changes made in the document. The dialog box contains buttons to accept and reject changes as well.

Adding Comments

To add comments while reviewing, we can use the **Track Changes** toolbar as well. Click at the place in the document where the comment is to be placed.

Step 1 Click **Insert Comment** button on the Track Changes toolbar. A comment box will be inserted on the right side of the window.

Step 2 Type the comment.

Step 3 Once done click anywhere on the document to activate it.

Note:- If more than one or two of users add comments then the comments by different users will be shown in different coloured comment boxes.

READERS VENUE

Deleting Comments

To delete any comment, click on the down arrow on the bottom right of the comment box. A popup menu will be displayed and it gives the option to delete only the current comment, all comments by a particular author and to delete all comments. Select the desired option.

Comparing Documents

Once the reviewers have made the changes and given their comments, Writer allows to compare the original document with the reviewed document.

Step 1 Open the edited document.

Step 2 Select **Edit** > **Track Changes** > **Compare Documents** option.

Step 3 The Compare To dialog box will appear. Browse and select the original file to be compared.

Step 4 The **Manage Changes** dialog box is displayed.Accept or reject the desired changes.

Step 5 Close the dialog box and **Save** the edited file.
